Health and Chemicals Forum

Date: Tuesday, November 17, 2026
Time: 13:15 – 18:00 (CET)
Location: Salle A or virtually via Zoom

About

The Health and Chemicals Forum will convene diverse stakeholders to strengthen the integration of health into chemicals management. It will focus on tracking health-related progress, accelerating practical action to prevent harmful chemical exposures, and mobilizing investment in safer and more sustainable solutions. Short expert inputs and facilitated panel discussions will support the identification of shared priorities, partnerships, and next steps for achieving the targets set out within the Global Framework on Chemicals.

The Forum is being co-convened by the Food Packaging Forum Foundation and the NYU Langone Health Center for the Investigation of Environmental Hazards with support from Health Care Without Harm and Geneva Environment Network.

Join Us In-Person or Virtually

All officially registered in-person GFC conference participants are very welcome to join the event in Salle A (Room A), and the event will also be fully hybrid to allow anyone to follow the discussions online. To join us virtually, please register in advance here. Learn more about the Forum and the speakers on the event page.
